**COMMENTS: Site visits conducted on 07/23 & 07/27/2007 found that there are No Critical Areas that are located on or within 200 feet of the proposed site disturbance of the proposed Motorcross Park Site.**

**I also found that there are Critical Areas located on and within 100 feet of the proposed "Conditional Use Boundary" that have not been flagged in the field for our verification and that they have not been properly identified in the narrative and are not typed, categorized or depicted on the site plan that was submitted for our review.**
