

February 23, 2008

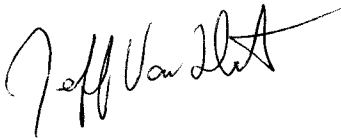

Dear NCCC Board and members,

The Mountain Loop Conservancy would like to extend our most sincere appreciation for your recent decision to assist us in our effort to prevent the construction of a proposed commercial motocross track facility six miles east of Granite Falls along the Mountain Loop Highway. As you know, we have just recently formed an association with the immediate goal of preventing the motocross racetrack and a longer-term purpose that is very much in alignment with the NCCC mission to prevent harmful misuse of the environment.

We have made significant progress in developing a plan for securing the resources needed to support our efforts, but it will some time before that plan translates into financial stability. With your support, we are able to mount a legal effort in a timely fashion, intervene early in the development process and therefore be much more likely of success.

Again, thank you for your very timely and very generous support.

Most sincerely,

A handwritten signature in black ink, appearing to read "Jeff Van Datta". The signature is fluid and cursive, with a long horizontal stroke extending to the right.

Jeff Van Datta
