

Traffic Narrative

Our traffic numbers come from our experience operating our track in Monroe. The track in Monroe was host to many local and regional race events and was open five days a week for practice riding. Our projections are similar for the track in Granite Falls. If you take the best year we ever had at MXGP in Monroe our average daily trip generation was 68. Our traffic mitigation offer was for projected numbers based on our best months year round when some day we have a covered riding facility for the winter time.

The track in Granite Falls is going to be very similar in numbers to the track in Monroe. We have more square footage in Granite Falls However we will not run all of the tracks at the same time. Having more tracks allows us to have the flexibility to groom one track while another track is running. When we build the indoor riding arena then we will have more average daily trips because we will be able to run year around. It will be at least five years before we achieve the projected traffic generations.

Traffic flow for average weekday practice:

3 trips are generated by track prep staff between 6am and 7am. The track opens between 10am and 12am. 2 trips are generated from sign up staff and medical staff between 9:30am and 10am. Riders begin arriving at 10am an average of 20 trips are generated between 10am and 12pm. Riders continue arriving as the day progresses generating 20 trips between 12pm and 1pm, 10 trips between 1pm and 2pm, 10 trips between 2pm and 3pm. After 3pm riders start to leave at about the same rate that they are arriving. Generating about 20 trips per hour between 3pm and 5pm. 20 trips are generated by 2 employees and riders leaving the park between 5pm and 6pm. 20 trips are generated by riders leaving the park between 6pm and 7pm. The rest of the riders and employee's leave the track between 7pm and 9pm generating 24 trips.

Traffic flow for an average weekend practice:

3 trips are generated by track prep staff between 6am and 7am. The track opens at 10am. 3 trips are generated by sign up staff and medical staff between 9:30am and 10am. Riders begin arriving at 10am 20 trips are generated between 10am and 11am. 20 trips are generated by riders between 11am and 12pm. 20 trips are generated by riders between 12pm and 1pm. 40 trips are generated between 1pm and 2pm 20 by riders leaving and 20 by riders arriving. 40 trips are generated between 2pm and 3pm 20 by riders leaving and 20 by riders arriving. 20 trips are generated between 3pm and 4pm by riders leaving. 23 trips are generated between 4pm and 5pm by riders and track prep staff leaving. 22 trips are generated between 5pm and 8pm by riders leaving and sign up staff leaving.
